Tampa, FL

CAREER SUMMARY.

Aspiring Junior Software Engineer with hands-on experience in application development fundamentals, programming concepts, and collaborative Agile environments and industry internship experience. Skilled in problem-solving, debugging, and working with modern development tools. Eager to grow technical skills, contribute to team-based projects, and build software solutions that support business and user needs.

AREAS OF EXPERTISE

Programming Fundamentals | Java | SQL | Software Development Lifecycle (SDLC) | Problem Solving | Debugging & Troubleshooting | Git Version Control | Team Collaboration | Data Analysis (Basic) | Microsoft Office 365 | Object-Oriented Programming (OOP)

PROFESSIONAL EXPERIENCE

DELOITTE

Tampa, FL

Software Development / DevOps Engineer intern

Aug. 2025 – Jan. 2026

- Collaborated within an Agile team to support development and deployment of application components using modern tools and workflows
- Contributed to building and maintaining CI/CD pipelines, gaining experience in how applications move from development to production
- Used Git for version control, managing code changes and collaborating on shared repositories
- Wrote and tested scripts to automate tasks, improving efficiency and understanding of system processes
- Participated in technical discussions, and backlog tracking using Azure DevOps.

LIDS

Tampa, FL

Assistant Manager

Sept. 2024 – Dec. 2025

- Trained and supported team members, strengthening communication and collaboration skills in a fast-paced environment and managing inventory and operations with attention to detail and accuracy.

MODERNIZED MOBILE

Tampa, FL

Technical Project Coordinator & QA Analyst

Jul. 2026 – Present

- Performed QA testing by executing test scenarios, documenting defects, and identifying functional and UI/UX improvements.
- Coordinated with clients and the development team to gather requirements, discuss priorities, and communicate project progress and milestones.

EDUCATION & TRAINING

COMPUTER COACH (CC)

Online

Front-End Development Bootcamp

May. 2026 – Jul. 2026

- Completed hands-on front-end development training focused on HTML, CSS, and JavaScript.
- Practiced building interactive, user-friendly websites and web applications through hands-on projects.

YEAR UP UNITED

Online

Application Development Training

Mar. 2025 – Jan. 2026

- Completed intensive technical training in programming fundamentals, software development concepts, database basics (including SQL), software testing, problem-solving techniques, IDE debugging, and application development methodologies while also building professional and career readiness skills, preparing for real-world development.

Certifications

- **Microsoft Azure Fundamentals (AZ-900)** – Validates foundational knowledge of cloud concepts, Azure services, and core security/governance practices.
- **Java Focus Certificate** - 12-week Immersive Developer Academy, Spring 2025 Cohort – Recognizes completion of an intensive program centered on Java development fundamentals and hands-on coding skills
- **How AI Works Certification** - Computer Coach Training Center (May 2026)
